OUR STRATEGY

GENERAL STRATEGY

our general strategy is to develop the environmental culture following the principles of continuous improvement management, step by step, while using the environmental management system based on ISO 14001:2015 standard. Our policy demonstrates our priorities characteristic for the environmental culture development step we are in, priorities that will change as we travel through the cultural change.

NOISE MANAGEMENT

environmental noise is an important impact of our business activities, that is managed according to the national legislation and GIIP*, as well as the ICAO recommendations defined in the document 9829 - guidance on the balanced approach to aircraft noise management, as the management framework.

WASTE MANAGEMENT

due to the current status of the waste management and its environmental importance it has been identified as the focus area. Waste at our airport is managed in line with the national legislation and the GIIP, under the hierarchical principle of: avoid, reduce, reuse, recycle, waste to energy and dispose.

ENERGY EFFICIENCY

energy management is another area of our focus, managed in line with the national legislation and GIIP, implemented by using the framework of ISO 50001:2018, including significant ongoing infrastructural and operational investments.

OUR STRATEGY

BIODIVERSITY

considering nature of our business and its impact to biodiversity it has been identified as a focus area, and it is managed following national legislation and GIIP.

GREENHOUSE GASSES EMISSION

as a globally and the industry relevant impact greenhouse gasses emission management is one of our focus areas. It is based on the national legislation and the GIIP, as well as the airport carbon accreditation program, as an umbrella framework, including the significant ongoing infrastructural and operational investments.

WATER MANAGEMENT

due to the current status of the water management and its environmental importance it has been identified as the focus area. Water management is based on national legislation and GIIP, as well as the good practices in spatial planning, infrastructure design, operations, quality assurance, monitoring, maintenance and treatment, including significant ongoing infrastructural and operational investments.

CONSTRUCTION ACTIVITIES

Taking into account nature of the ongoing reconstruction and modernization project it has been identified as the focus area. The strategy in this field is based on following national legislation, GIIP, VINCI Airports corporate standards.

OUR STRATEGY

LABOUR MANAGEMENT

recognizing that people are our highest corporate value and that sound human resources management is key for the environmental sustainability, the communities we operate in and our business in general, this aspect is managed with strict following of the national legislation and the GIIP, as well as VINCI Airports corporate social responsibility frame-work.

STAKEHOLDER ENGAGEMENT

taking into consideration the environmental and social context we operate in, stakeholder engagement is one of our top priorities and is guided by the national legislation and GIIP, everything under the VINCI Airports corporate umbrella framework called 'Together'.

ENVIRONMENTAL AND SOCIAL MONITORING

monitoring is of utmost importance for measurement of our performance and is guided by the national legislation, GIIP and by VINCI Airports corporate requirements. It consists of monitoring of our own environmental and social performance, as well as performance of our contractors and suppliers.

OUR STRATEGY

CONTINUOUS IMPROVEMENT CULTURE

the environmental culture journey we are committed to go through is based on the principles of continuous improvement, developing the culture step by step, from reactive culture, through calculative and proactive, to generative culture as our destination.

LEADERSHIP AND COMITMENT

for the purpose of the strategy execution our management defines objectives and targets, communicates them internally and externally and ensures the resources for their achievement. Our management demonstrates leadership in their daily activities by promoting environment and social as the value and by leading by example.

GIIP - Good International Industry Practice Belgrade Airport committed to implement throughout all the operational and construction activities, including the IFC Performance Standards on Environmental and Social Sustainability and the EBRD Environmental and Social Performance Requirements
